

Reflection Name: Luke Warner

Total Points__100__

Every week in this class, you will reflect on your learning. Your participation in the summary is a summation of your answers the following questions. The questions are categorized on the difficulty of depth. Each question you answer is worth that many points; when you are done answering the questions, give yourself a total score based on the rubrics and provide justification in one sentence. You can only use each question once.

Please answer a subset of the following questions:

- 5 pts Questions **Affect: (What?, So What?...Return, Report, Reflect and Regroup.)**

What? (Return and Report)

- What did I do to prepare for class this week?
- What evidence can I provide that demonstrates with affirmation statements?
- What concept from this week are you uncertain of or would like to know more about?
- What topics were studied this week, and what are their definitions?
- What phase of your projects did you complete?
- In your team meeting, what were the answers to this week's questions?
- Summarize this week's scenario?
- Where did you put your assignments in GitHub?

So What? (Reflect and Regroup)

- What did I learn from the study material?
- Why is this week's topic important?
- How did this week scenario relate to the week's topic?
- What did you learn from your work on your project?
- What insights did your team learn from this week's questions?
- What actions were assigned to you, in your team meeting?

- 10 pts Questions **Behavior: (What now?...my ideas are starting to emerge!)**

- What is the most significant take-a-way you have gained from your study this week?
- What do you do, steps, or processes related to this week's topic?

- How would you explain this week's topics to a person not in this class?
 - What did you learn by explaining this week's topic to someone not in this class?
 - Write a SMART goal for next week?
 - What would you do differently next week?
 - What five take did you get from the scenerio?
 - How does the weekly topic relate to the MIM model?
- 20 pts Questions **Cognitive: (Wow, I learn?... Ok that is deep!)**
 - Why is this week's topic important for teamwork?
 - How do plan on contributing to the team, besides completing your tasks?
 - How does your experience relate to other experiences you have had?
 - How does your experience relate to other classmates' experiences?
 - Tell me about what you taught someone? And what did they learn, that they didn't know before?
 - If you were to write your experience as STAR story, how would you phrase it?
 - If this was a religion class, how would you relate this week's topic to the gospel?

What did I do to prepare for class this week?

This week I explored the I-learn section for this class to become familiar with the modules and where to access the material. I reviewed everything discussed in class to make sure I remember. After class on the same day I began the reflections paper and the required readings.

Why was this week's topic important for teamwork?

I believe this can be answered with Henry B Eyring's talk. He spoke of how those at Ricks always were able to make do with less and thrive. He talked of how changes in life make things complicated and difficult. He talked about the humble beginnings of the school. Despite all these hard things, he promised and prophesied concerning those who would attend the school and he spoke of success in more ways than academically. Being able to make do with less is a challenge, but it is needed for teams to be able to find better ways of doing things. Almost all problems in life adapt and so the solutions

also need to. As a team, those involved have to be flexible and resilient to all changes until success is achieved.

If this was a religion class, how would you relate this week's topic to the gospel?

I think this topic is super relatable to the gospel. Being self-reliant is a huge part of our mortal progression aka making do with less, living within our means, etc. Change is part of the gospel. It's part of repentance. We can't always predict how our lives will be so we have to trust that God is aware and in control even though we can't see a way out. But we have to keep trying always, just like with solving any problem. Just because something is difficult, we can't give up or give in. Going on and pushing through makes us stronger and smarter.

What is the most significant take-a-way you have gained from your study this week?

This cannot be done alone. We can't write any significant programs alone. One person simply isn't efficient enough. It requires cooperation and teamwork to achieve success.

Write a SMART goal for next week?

This week I will start all of the assigned readings and preparation, the day before so I can review it the day of and remember it a lot easier.

What would you do differently next week?

I will participate more in class by asking at least one question each class.

What did you learn by explaining this week's topic to someone not in this class?

I learned just how long real life projects and programs take to make, like browsers. It's an insane amount of people and time.

How would you explain this week's topics to a person not in this class?

Applications and programs take a lot of time and work to develop and improve. Teamwork is crucial in the development of these. Soft skills are in high demand, which is the ability to work well with others.

Why is this week's topic important?

Working in a team as part of a team is now almost a requirement in nearly all job settings. Learning how to work with others will only make my own life easier and more productive.
